Purpose of this Manual

This user guide is intended to assist direct care service providers, agency directors/supervisors and staff to understand and incorporate integrative screening practices within their settings, using the *No Wrong Door Integrative Screener Agency-Level Aggregate Workbook*. The information contained in this guide is designed to provide:

- An overview of the *No Wrong Door Integrative Screener Agency-Level Aggregate Workbook* and general tips for administration
- Instructions to guide the use of the *No Wrong Door Integrative Screener Agency-Level Aggregate Workbook* in its electronic version using a computer or tablet
- Examples to demonstrate the overall screening process, from start-to-finish, using the *No Wrong Door Integrative Screener Agency-Level Aggregate Workbook*

Disclaimer. The information captured by the *NWD Integrative Screener Agency-Level Aggregate Workbook* is considered protected health information (PHI). The information captured should be safeguarded in accordance with an individual agency's privacy practice and the Health Insurance Portability and Accountability Act of 1996 (HIPAA). This user guide does not provide instructions on how to use the *NWD Integrative Screener Agency-Level Aggregate Workbook* in a manner that is HIPAA compliant. All questions regarding the security of client PHI should be directed to the HIPAA compliance or privacy officer within individual agencies.

Disclaimer. Duke University holds the copyright to the Duke Health Profile developed by Dr. George Parkerson. Duke University has granted UMBC permission to incorporate the Duke Health Profile within the *No Wrong Door Integrative Screener Agency-Level Aggregate Workbook* for the purposes of training and dissemination activities resulting from a project federally funded by SAMHSA. UMBC nor any other agency, organization or like entity may charge a fee for use of either the Duke Health Profile or the *No Wrong Door Integrative Screener Agency-Level Aggregate Workbook*. No alterations to the form of the Duke Health Profile shall be made by UMBC or those in receipt of it or other associated materials. Duke University, nor UMBC, along with any of its affiliates, will not be liable for any clinical or medical practice and treatment decisions made by those using the Duke Health Profile or *No Wrong Door Integrative Screener Agency-Level Aggregate Workbook*.

About the Authors

The Center for Community Collaboration (CCC) is located in the University of Maryland, Baltimore County (UMBC) Department of Psychology. The CCC was initially created as a university-community collaborative with the Infectious Disease Bureau (IDB), Prevention and Health Promotion Administration (PHPA), of the Maryland Department of Health and Mental Hygiene in 2004. Our mission has been to provide capacity building and training services for the implementation of evidence-based practices within direct care services agencies.

The following current and former CCC staff, contributed to the writing of this manual:

Carlo DiClemente, Ph.D., ABPP, Center Director
W. Henry Gregory, Ph.D., Associate Director
Krystle F. Pierce, M.P.P., Project Director
Amber E. Q. Norwood, Ph.D., Assistant Research Scientist
Letitia E. Travaglini, M.A., Project Assistant
Catherine Corno, M.A., Project Assistant
Meagan Graydon, M.A., Project Assistant
Daniel Knoblach, M.A., Project Assistant

Acknowledgements

Development of program materials and training curricula was supported by the following entities:

Infectious Disease Bureau, Prevention and Health Promotion Administration of the Maryland Department of Health and Mental Hygiene (DHMH)

**Substance Abuse and Mental Health Services Administration
(SAMHSA Grant No: SM-11-006)**

We would like to acknowledge the contributions of former Center for Community Collaboration project staff as well as the individuals, partnering entities, and community-based organizations with which the CCC has had the opportunity to collaborate with as part of this project.

The CCC wants to highlight the contributions of Letitia Travaglini, M.A., who provided invaluable support in the development and design of the *NWD Integrative Screener*, specifically for the electronic version of the screener. This program would not have been possible without her knowledge of Excel® and dedication to excellence in achieving the formatting and scoring mechanisms of the electronic version of the *NWD Integrative Screener*.

Using the NWD Integrative Screener as a Data Collection Tool *Agency-Level Aggregate Workbook*

The *NWD Integrative Screener* was designed to be user friendly for providers and agencies. Many items and health domains that agencies are often required to report to local, state, and/or federal entities have been included in the *NWD Integrative Screener* to reduce reporting burden. As a way to help with the reporting process, providers can take steps to combine all responses collected from completed screeners to obtain agency-level data (a snapshot at one time-point) using the ***Agency-Level Aggregate Workbook***.

Using the Data Collection Tool

It is important to note that client names will not be included in the ***Agency-Level Aggregate Workbook***. All client responses will be identified based on client ID.

Each row of data represents a completed screen for an individual client. For each individual client, the data collection tool tracks:

- Subscale scores for each health domain
- Referral need, agreement, and whether the referral was made (yes/no)
- Readiness ratings for each health domain
- Individual items score

7	DATA	LET	3100	Outpatient Ps	02/10/16	40	60	60	0	0	0	0	50.001	50
8	DATA	LET	2900	Outpatient Ps	02/10/16	50	40	30	30	50	0	50	71.43	70

13	DATA	LET	2301	Outpatient Ps	02/10/16	50	40	30	30	50	0	100	64.287	50

Agency-Level Aggregate Workbook

For overall agency-level data, the ***Agency-Level Aggregate Workbook*** tracks:

- Average subscale scores for each health domain
- Overall number of clients at or above a cut-off score (i.e., needing referrals) for each subscale score
- Total number of referrals needed, referrals agreed to, and referrals made
- Average readiness ratings for each health domain
- Frequency counts and/or average scores for individual items, where appropriate

To obtain agency-level data, two Excel® workbooks must be open on the user's computer:

- 1) The ***NWD Integrative Screener*** workbook (either client or provider version)
- 2) The ***Agency-Level Aggregate Workbook***

IMPORTANT: Make sure you are opening and saving a new version of the *NWD Integrative Screener* Excel® workbook for each client. Data is only stored for one client within each *NWD Integrative Screener* Excel® workbook. Overwriting a client's responses will also change the data presented within the **Data Sheet** tab of the workbook

The next few pages outline steps for obtaining agency-level data using the ***Agency-Level Aggregate Workbook***.

For technical assistance and support or to request a copy of the *NWD IS Agency-Level Aggregate Workbook* please contact UMBC's Center for Community Collaboration at 410-455-5840 or communitycollaboration@umbc.edu.

Steps for Using the Agency-Level Aggregate Workbook

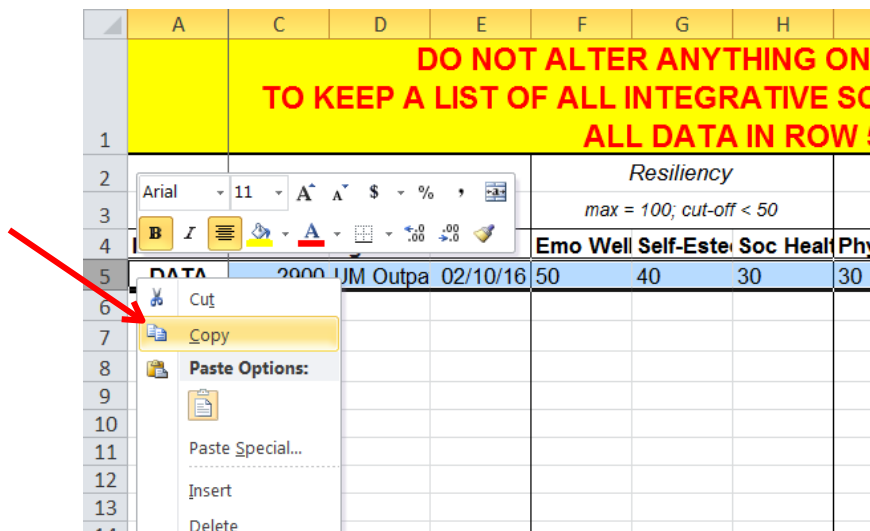

1. Upon completing pages 1-6 and the **Interview Page** of the *NWD Integrative Screener* electronically, values for each client response will populate in the **Data Sheet** tab in the *NWD Integrative Screener Excel®* workbook.

DO NOT ALTER ANYTHING ON THIS PAGE. TO KEEP A LIST OF ALL INTEGRATIVE SCREENER DATA, COPY ALL DATA IN ROW 5											
2					Resiliency			Physical Health			
3					max = 100; cut-off < 50			max = 100; cut-off = 50

Page 3 of 6 Page 4 of 6 Page 5 of 6 Page 6 of 6 Interview Page Scoring Sheet **Data Sheet**

Note. If the **Data Sheet** tab is not currently visible in the *NWD Integrative Screener Excel®* workbook, the tab is likely hidden. To unhide, right-click any of the tabs and from the options select “unhide”. A menu of the hidden tabs will appear, select the **Data Sheet** tab and then click “OK.”

2. Open the **Data Sheet** tab (shown above). Right click on the row number in the **Data Sheet** tab containing the client’s responses (to highlight the entire row) and select “Copy.”

- Open the **Agency-Level Aggregate Workbook** and paste the client responses on the next available line in the **Raw Data** tab. Since values are attached to code within the *NWD Integrative Screener* workbook, you will need to "Paste as Values" rather than pasting as you normally would. To do this, right click the row number in the **Agency-Level Aggregate Workbook** and select the paste option designated by the "123 clipboard" icon. Alternatively, you can select "Paste Special" and select the "Values" option.

Note. Pasting without specifying the Values option will result in error messages.

- Repeat steps 1 through 3 to add new client cases to each row within the **Agency-Level Aggregate Workbook**.

IMPORTANT: As a program or agency, you can decide if you want to have one large dataset (one **Agency-Level Aggregate Workbook**) for all clients who complete the *NWD Integrative Screener*, or have separate datasets based on reporting periods, program within your agency, etc.

Note. Means (averages) and frequency counts are currently set so that you can include a maximum of 2,000 clients within the **Raw Data** sheet.

Additional Aspects of the *Agency-Level Aggregate Workbook*

Raw Data Tab

Within the **Raw Data** tab, means (averages) and frequency counts are calculated (when applicable) to give an overall understanding of clients functioning. Also included are cut-off scores indicating referral needs.

Data Codebook Tab

The **Data Codebook** tab provides information on each of the subscales and individual items listed. Ranges and cut-off scores needed to determine subscale referral needs along with value labels for each individual item (e.g., 0 = None, 1 = Some, 2 = A Lot) are also included.

Health Domain Tabs

There are health domain tabs (Demographics, Physical Health, Mental Health, Substance Use, HIV-ID Risk, HIV-ID Testing, and Stigma) that display output similar to what is presented on the electronic **Feedback Sheets**. The user entering or reviewing the data will need to manually type in today's date and the range of dates for which the data apply (i.e., dates for the first and last client entered into the dataset) on the **Demographics** tab; dates will automatically copy over to the other health domain sheets. Specific instructions for this are included in comments within the cells (marked with a red arrow). The rest of the information included in the health domain sheets is automatically populated based on the data copied from the *NWD Integrative Screener* workbook.

Pain	57.14		
Number of Individuals at or above the cut-off:			
	N	%	Scores at or Above cut-off (50) for General Physical Health indicate possible need for Primary/Medical Care Referral
General Physical Health	1	14.29	
Primary Care Services			
	N	%	Referral Recommended if No Provider or last visit more than 1 year ago
Clients with Primary Care Provider:	6	85.71	
Clients without Primary Care Provider:	1	14.29	
Individuals who's last doctor's visit was more than 1 year ago:	2	28.57	
Average Time since Last Doctor's Visit:	0.99 years		
Pregnancy and Prenatal Care			
	N	%	Referral Recommended if pregnant & not receiving Prenatal Care
Individuals who are Pregnant:	1	14.29	
Individuals receiving Prenatal Care (if needed):	1	100.00	
Individuals not receiving Prenatal Care (if needed):	0	0.00	
Average Length of Pregnancy (to date):	12.00 weeks		
Primary/Medical Care Referrals:			
	N	%	• Referral need based on indicators listed above. • Agreement based on client readiness to accept referral. • % Agreed and % Made based on number of referrals needed (versus overall number of people screened)
Referral Needed:	3	42.86	
Agreed to Referral:	1	33.33	
Referral Made:	1	33.33	
Average Readiness Rating:	4.00		

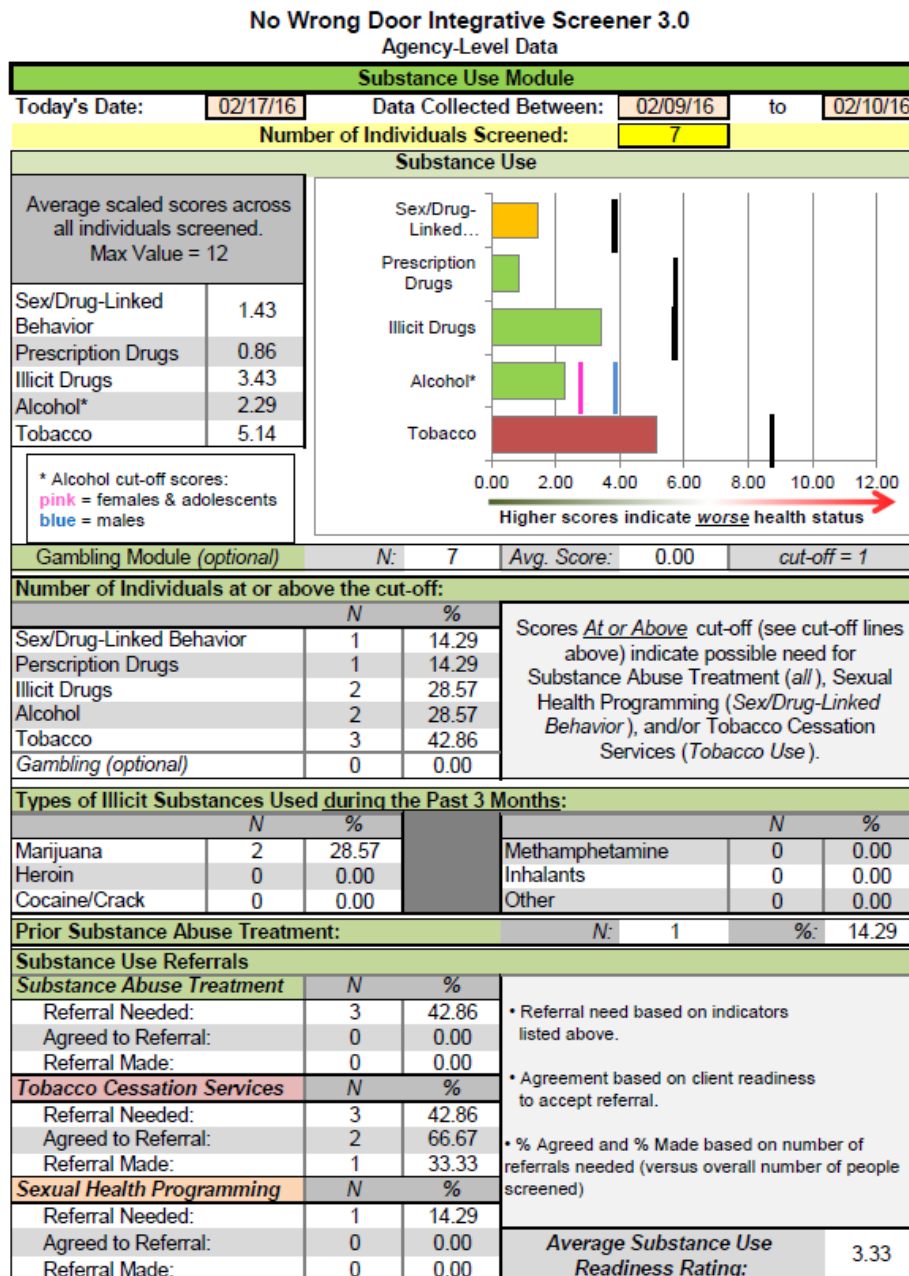

Mental Health

- Average scores for each resiliency subscale (general well-being, self-esteem, social health) and symptom severity subscale (depression, anxiety, trauma, suicide)
- Average scores for those clients who completed the Serious Mental Illness Optional Module (psychosis and mania)
- Frequency and percentage of clients who scored at or above the cut-off for each subscale
- Frequency and percentage of clients who have engaged in mental health treatment in the past
- Frequency and percentage of clients who need and agreed to referral for mental health concerns
- Frequency and percentage of referrals made for mental health concerns
- Average readiness rating for addressing mental health concerns

Substance Use

- Average scores for each subscale (alcohol, tobacco, illicit drugs, misuse of prescription medications, sex/drug-linked behavior)
- Average scores for those clients who completed the Gambling Optional Module
- Frequency and percentage of clients who scored at or above the cut-off for each subscale
- Frequency and percentage of clients who reported using specific illicit drugs in past 3 months
- Frequency and percentage of clients who have engaged in substance use treatment in the past
- Frequency and percentage of clients who need and agreed to referral for substance abuse concerns, tobacco use, or sexual health programming
- Frequency and percentage of referrals made for substance use concerns, tobacco use, and sexual health programming
- Average readiness rating for addressing substance use concerns

HIV-ID Risk

- Average risk score for each subscale (sexual risk, sex/drug-linked behavior, other risk factors)
- Frequency and percentage of clients who scored at low, moderate, or high risk for each subscale
- Frequency and percentage of clients who endorsed specific risk factors
- Frequency and percentage of clients who need and agreed to referral for sexual health programming, sexual risk reduction counseling, or HIV/infectious disease testing
- Frequency and percentage of referrals made for sexual health programming, sexual risk reduction counseling, and HIV/infectious disease testing
- Average readiness rating for testing and addressing sexual risk behavior

Stigma (Optional Module)

- Frequency counts and average stigma ratings for those individuals who completed each domain within the stigma module
- Frequency and percentage of clients who scored at or above the cut-off for each stigma domain

No Wrong Door Integrative Screener 3.0
Agency-Level Data

Today's Date: 02/17/16 Data Collected Between: 02/09/16 to 02/10/16

Internalized Stigma (Optional Module)

Average scores across all individuals screened.			Individuals At or Above Cut-off	
Stigma Category	N	Score	N	%
Mental Health	6	1.00	3	50.00
Substance Use	3	0.00	0	0.00
HIV-Positive	1	0.00	0	0.00
MSM	0	N/A	0	N/A

Stigma items are only asked if client responses indicate:

- Mental Health Concerns
- Substance Use Concerns
- Positive HIV Status
- Client is a Man who has Sex with Men (MSM)

Internalized Stigma may be a barrier to treatment engagement
